Dr. Yuwen Gu
Department of Statistics
University of Connecticut

Dear Yuwen:

This example demonstrates the UConn Department of Statistics letterhead. The logo and sender information form the masthead, while the recipient, salutation, body, and closing follow in a consistent layout.

To write your own letter, edit the sender settings in `\UConnLHsetup` at the top of this file, then replace the recipient and body. No separate sender setup file is required.

Compile the letter with `pdflatex SampleLetter.tex`. The `signed` option includes your configured signature image; remove that option for a letter with space for a handwritten signature.

Longer letters continue on additional pages with the sender name, date, and page number. The closing and signature stay together.

Sincerely yours,

Jun Yan
Professor
